Green Landscape

綠色景觀

文字：Carol 空間設計：One Plus Partnership Ltd 攝影：Jiangnan photography

Design: One Plus Partnership Ltd. 設計：One Plus Partnership Ltd.
Category: Commercial and Retail Space 形式：商業空間
Material: Hand-woven carpets / Stainless steel (Silver; Copper; Matte gray-black) / Marble / Wood 材料：手織地毯 / 不鏽鋼（銀色；銅色；啞灰黑色） / 雲石 / 實木
Area: 1,000 m² 面積：302.5 坪
Project Year: March, 2017 時間：2017.03

綠，是大自然的顏色，象徵活力與生機，引人自在與親近。然而，在城市的迅速發展過程裡，櫛次鱗比的高樓華廈勢必壓縮到綠地。意識到這點，有越來越多建築師試圖將大自然紋理織入都市建築之中，創造出一片綠色屋頂或垂直花園；設計師亦在室內布以植生牆，讓居住者和花草相生、共呼吸。

位在中國的深圳也面臨著相同問題，儘管在快速都會化的腳步裡同時興建更多公園，但依然缺乏足夠綠景。因觀察到此一大環境現象，也為了與開發商在深圳住宅項目中的大片綠地規劃相呼應，設計者遂以「綠色景觀」為題打造來福士廣場銷售中心。整體空間自地面、牆壁至天花，大膽採用不同深淺層次的綠鋪陳，宛如一座巨大神祕的森林般，一改銷售中心的傳統面貌。

立面設計以不同形態及角度創造波浪起伏的視覺效果；腳下地毯則運用有如地形輪廓線的曲徑圖樣延伸，恰與牆面相輔而行；天花的挖空設計帶來置身鬱鬱森林仰望天空的錯覺，並且擴大了空間感。天、地、壁緊密相繫的設計，為空間形塑互為一體的和諧感。地毯與牆面間的石階順應地毯曲線層層堆疊，增添空間奢華氛圍，亦再次凝造只屬自然生態的景觀之美；沿著石階而上，錯落有致的人造樹在每一個轉角締造驚奇，完整呈現整座森林樣貌。以綠植導引空間的設計除了突顯住宅物業特色，亦可視作城市裡的避風塘，令客戶在此盡情放鬆、享受綠意。

Spending time in the green space is always a pleasant activity to take a break from the busy day. Shenzhen, as one of the fastest-growing cities in China, it is not difficult to see people lingering in the parks for leisure. Meanwhile, the government has been focusing on eco projects in recent years to provide more green areas to improve citizens' living condition. However, even there is a growing number of parks, the city is still in lack of sufficient green space. In face of this situation, the developer of Shenzhen Raffles City has incorporated a lot of green space in their residential project. To highlight this feature, the designers incorporated "green landscape" as the theme of the sales office to create a comfortable area for the clients, as well as breaking the traditional conventions of sales offices.

Bold use of green covers the entire space from the floor, wall to the ceiling, as if indulging in a large mysterious forest. Different shades of green are applied to strengthen the visual effect by giving more depth and layers. The walls are specially designed in a dynamic fashion by protruding from various extents and angles. The curvy pattern of the carpets imitates geographical contour lines, echoing with the form of walls. The hollow design of the ceiling greatly increases the spatial perception, forming an illusion of looking up at the sky in a forest. The matching pattern of the ceiling, wall and carpets together create a harmonious atmosphere in the entire area.

Stacks of stone layers are placed next to the wall in accordance with the pattern on carpets, elevating the sense of luxury, and also resembling natural topography in forests. Together with the artificial trees built on the stone platforms, the picture of a moving forest is vividly presented.

Not only does the prominent design of this sales office emphasize the characteristics of the residential property, but also acts as an urban sanctuary for the customers to enjoy a minute of relaxation and greenery.
